Super T-10 Transmission

An improved version of the original T-10, fully redesigned transmission is 50% more durable and weighs 10 pounds less than earlier models. Engineered to deliver improved acceleration, the four-speed countershaft, helical gear transmission is synchronized in all forward gears. First and reverse are "constant mesh" to prevent gear "clash", and strut-type synchronizers are used to ease shifting and increase durability. Each transmission features a low first gear ratio, while retaining relatively close ratio spacing between second, third, and fourth gears to minimize RPM "drop" during each gear change. Bellhousing, flywheel, and clutch components must be purchased separately.

Solo 2 and Solo 2 DL GPS Lap Timers

The most effective way to acquire accurate lap times, the Solo 2 utilizes advanced GPS data to deliver unparalleled speed and accuracy. Relying on a database of over 2,000 race tracks, lap timer identifies its position, recognizes the starting line coordinates of the track, and immediately begins sampling lap times. Unit can provide precise and powerful data that may be reviewed on the built-in screen immediately after each session, or through Wi-Fi utilizing a PC. Available Solo 2 DL additionally allows connecting to the vehicle's ECU to collect even more data with just a single added cable.

IR Beacon Transmitter

AIMX02TXKMA01 **\$50.99**

Optical lap transmitter works with an optic receiver to display lap times on a data logger instantly. Simply position the transmitter at the start/finish line to record lap times. Unit operates in "lower power" mode with AA batteries, or with the external wiring harness and a 12-volt battery in "high power" for wider tracks.

MyChron5S/MyChron 5S 2T Dash Logger

Engineered for use on karts, the MyChron 5S combines the sampling of kart data with new GPS capabilities that record precise, reliable data including lap and split times, speed, RPM, single temperature, track position, acceleration, and more. Unit includes the ability to offer basic information to newcomers or the most advanced data to professionals. Large 268 x 128 pixel graphical display with 8 backlighting colors eases readability. Data may be downloaded wirelessly utilizing a Wi-Fi connection without the need for a data key or PC connection, if desired. Available MyChron5S 2T additionally includes the ability to sample a second temperature of choice. Sold complete with battery charger, RPM cable and temperature sensor(s).

IR Tire Temperature Controller

AIMXSSSMIRTEMP00 \$100.99

Engineered for use in conjunction with the MyChron5, kit is designed to measure the surface temperature of tires, offering important data for chassis tuning, tire performance, and driver performance. Infrared sensors include a 35° field of vision and range of -20 to 120° C. Includes controller and four sensors.

AIMX05TTS01B0	Infrared Tire Temperature Sensor	\$100.00

MultiChron Stopwatch

AIMX02CHRN05 \$159.00

MultiChron stopwatch/timer allows tracking up to four competitors simultaneously, displaying the best laps, and up to 99 laps per driver on a bright, backlit display. Unit also offers split timing with up to nine splits per driver.

EVO4S Data Logger

AIMX61E4S4001GS

The EVO4S utilizes one connector per channel and a completely redesigned internal electronic board that is fully compatible with Aim dash loggers and new Race Studio software. Unit samples data from the ECU via CAN, RS232, or K-line, and from analog/digital inputs, external expansions, and predefined math channels. Sensors may be connected to five configurable analog channels, to the RPM input, and 2-wheel speed inputs. Often expanded for use with the channel expansion unit and the SmartyCam HD camera. Sold complete with the GS Dash for display, GPS08 roof mount module and 4m cable.

SmartyCam HD

HD camera is engineered exclusively for motorsports with the goal of providing superior video quality and improving on-track performance. Unit overlays GPS data including track map and vehicle position, speed, lap, and split times. With the addition of an Aim logger connected to the ECU, RPM, throttle, engaged gear, acceleration, temperatures, pressures, and other critical performance values may be overlaid as well. Included Race Studio 3 software allows configuring videos as desired. Recording may be started/stopped automatically when the speed/RPM threshold is exceeded, eliminating the need for driver interaction.

Pro-Comp Race Dash ATM6014 **\$1,549.95**

Specially designed for dirt and asphalt circle track racing, this compact, waterproof dash combines an analog tachometer with digital displays of all engine essentials. Monitor RPM, oil pressure, oil temperature, water temperature, carb fuel pressure, voltage, and an optional water pressure channel while customizing specific warning points for each readout. Records track session data with playback on the dash. Includes pre-terminated wiring loom, necessary sensors, manual, and installation hardware.

TKX 5-Speed Transmission

This series of rear wheel drive manual transmissions is ideal for muscle cars and hot rods. The unit is built with multi-cone synchronizers and unique hybrid synchronizer rings to achieve smooth shifts even at high engine speeds. The three-piece compact aluminum housing provides body tunnel clearance while improving case strength and structural stiffness. All gears and shafts made from ASTM 4615 grade steel. Overall the TKX-series handles up to 600 ft./lbs. of torque with engine speeds of 8,000 RPM with shifts at 7,500 RPM. Available in a variety of gear ratios.

1979-93 Mustang Sub-Frame Connectors DSE010114 **\$325.00**

This set of two-inch square steel tubing reinforcements is designed to address multiple Fox-body issues by strengthening the lower link pocket and rear torque box as well as the seat mounts and connects the rear torque box to the firewall to create one complete frame rail. Compatible with the stock suspension and doesn't affect ground clearance.

1979-93 Mustang Mini Tubs DSE040406 **\$440.00**

This pair of mini tubs will accommodate wider tire and wheels, up to 315 mm wide, without requiring rolling, flaring, or frame rail modification. Includes seat belt relocation bracket allowing the use of the factory rear seat. Stamped from 18-gauge steel. Made in the USA.

Pro Mod Dry Sump Tank

MOR22617 **\$699.99**

This aluminum Pro Mod dry sump tank features a removable top, -16AN male inlet, -16AN male outlet, and has a 7" diameter.

Remote Oil Filter Adapter Mount

MOR22761 **\$136.99**

Billet aluminum base with 2-5/8" bolt spacing that allows the mounting of remote oil filter mounts when used in conjunction with a 7" diameter dry sump tank on a motor plate. The stainless steel band clamp has an interlocking rubber cushion.

Black Wrinkle Finish Remote Breather Tank

This clamp-on style filtered breather offers an inlet(s) and a petcock for tank draining. 11-1/2" tall (tank with filter), 3-1/8" diameter. Includes mounting bracket and filter.

Black Wrinkle Finish Universal Power Steering Tank

MOR63951 **\$108.99**

This aluminum power steering tank features a black wrinkle powder-coated finish, -6AN male inlet, -10AN male outlet, and a heavy-duty vented screw on cap.

5" V-Belt Crank Pulley

MOR23525 **\$76.99**

Ideal for alternators and/or vacuum pumps. Fits any one-inch diameter crank-driven mandrel with 1/8" x 1/8" keyway. Billet aluminum with a hard-coat black anodize finish.

Billet Aluminum GM-LS Oil Filter Adapter

MOR23707 **\$81.99**

Ideal when limited space prevents the use of a block mounted filter or when a larger external filter is required. The 90° billet aluminum mount uses -10AN female in/out ports and includes hardware and engine block O-rings.

Dual Breather Tank

MOR85391 **\$214.99**

Large-capacity breather tank for use with large-displacement powerplants as well as engines with extreme power adders. The aluminum tank features internal baffling with mesh media for separation of air and oil, two clamp-on paper gauze breathers, a ball valve drain, and two -16AN female inlets. 7"W x 15"T x 4"D.

Dart LS GEN-3 Skirted Block/Early GM F-Body Road Race Oil Pan

MOR20152 **\$449.99**

This 7-quart capacity oil pan has a thick laser-cut steel rail specifically for the LS GEN-3 skirted engine block and clears a 4.25" stroke. The race-proven three trap door assembly and anti-slosh baffle keeps oil contained in the pickup area during road racing and drag racing. The fabricated steel sump has a clear zinc finish. Applications include 1967-92 Camaro, 2010-15 Camaro, 1968-78 Nova, 1965-72 Chevelle, 1953-96 Corvette, 1978-88 G-Body, and GM S10/S15 2WD Truck.

Chevelle Tubular Lower Control Arms – Helix Bottom, LH

ALL57811 **\$219.99**

Heavy-duty control arms are made with 1-1/4" D.O.M. tubing with 1" D.O.M. cross-bracing. Helix bottom correctly positions 5" or 5-1/2" conventional spring for proper performance. Black powder-coated with high-quality rod ends and separate shock bracket which will require welding or bolting onto the arm. Rod end spacer kit is required to adapt rod end to fit in the stock frame mount (sold separately). These lower control arms are intended for racing and will not accept stock-style lower ball joints.

Rod Ends

Two-piece spherical rod ends have a pivoting steel ball and are sold each.
